OFFICIAL

Of American League Pitchers For 1911

COVINGTON HEADS THE LIST

But as He Pitched in Only Eight Full Games, the Honor of Being the Real Leader Falls to Bender of the Athletics.

New York, Nov. S .- The official pitching records of the American league baseball clubs, made public to-day, show that Covington of Detroit has the highest percentage, with .875, but he pitched the Standard Oil company, contracts only eight full games. Bender of the Athletics is the real leader, with a percentage of .773. Walsh of Chicago can be worked out, the additional refinpitched the most games, having officiat- eries will be built. The company pays

MOVE AGAINST STANDARD OIL.

Independent Producers to Build a Re-

Pittsburg, Pa., Nov. 8 .- The movement f independent oil producers against the Standard Oil company to force up the price of crude oil has been given a great impetus by the Butler county oil producers subscribing \$250,000 in stock to back the refinery being erected at Bruin, Pa. This refinery, No. 1, has a capacity of 20,000 barrels a month, and this will be increased to 40,000 next spring. Plans are also being made for the building of another refinery.

At a mass meeting of independent oil men favorable to the movement against ed in 45 full contests and ending with a percentage of .600.

The percentages were as follows:

throughout the Illinois corn belt, althrough facing heavy loss from the large amount of grain that has rotted in the fields because of excessive rain, have determined to recoup part of their loss by not patronizing the coal dealer. They will use the decayed corn for fuel during the winter months. It is said that the amount of corn left in the fields is the largest in the history of Illinois.

ISLAND THROWN UP, SINKS.

Ocean.

Port of Spain, Trinidad, Nov. 8 .- The mud volcano, which rose unexpectedly with an outburst of fire and smoke be tween the island of Trinidad and Venezuela, appears on closer investigation to have two craters which have been quite active. Yesterday it was reported that the formation seemed to be sinking and because of the soft nature of the clay in the sea bed it is thought that the new island may not prove permanent.

Rockland, Mass., Nov. 8 .- Robbery of \$456 from the safe of the town treasurer which took place on March 27 last, be came known yesterday, when Chairman Townsend of the selectmen announced that \$375 had been spent in fruitless efforts to apprehend the robber.

LARGE SALT PRODUCTION.

Figures of United States Geological Survey Show Increased Output.

The United States produced 30,305,656 barrels of salt in 1910, valued at \$7,900,-344, according to figures compiled by W. C. Phalen and just published by the United States Geological Survey. This vas an increase of 198,010 barrels over the production of 1909 but a decrease in value amounting to \$443,487. The six 408-1246 leading producers of salt in 1910 were islana and California. Nearly 29 per cent, of the salt consumed in the country was obtained from domestic sources, the United States having long been independent of foreign production.

Sait is thought of mostly in connection with cooking and seasoning, but it has a great many other important applications. It is used largely in the preservation of fish and meat, in the dairying industry, and in chemical metallurgical processes. It is also used as a source of evidently Akabah, a fortified village of chlorine employed in the manufacturing Arabia, on the east side of the Gulf of bleaching powders and in the chlorina-

tion of certain gold ores. ifornia product is obtained from the Italians, meeting with unexpected op-ocean. IN BOSTON MARKETS.

Eggs Growing Scarce, Some Selling at 50 Cents Per Dozen,

Boston, Nov. 8,-The scarcity of eggs s still increasing in the local market and prices continue to work higher. Hennery eggs are in very limited supply and dealers who have any can obtain about any price they see fit to ask. Of course, the number of retailers who can handle them at the prices they now command is growing smaller, but there are some who must have them and with these dealers the price is not an important consideration. But 50c or more a dozen for hennery eggs sends a good many dealers onto gathered eggs of good tendency. There is a very firm, but not especially active, market for butter and cheese. Higher prices for both butter and cheese are noted in the primary Higher prices for both butter markets and that is the governing influ-

FEED OF YOUNG CHICKENS.

Dry Feeds Least Likely to Cause Stom-

It has been estimated that less than one-half of the eggs that are set hatch and less than one-half of those hatched are raised. Many poultrymen count on raising only one-fourth as many chickens as there are eggs set, and many fall short of that amount. Under improved conditions, such a great loss is entirely unnecessary. It is somewhat late in the year to consider means of preventing losses at incubation, but a few suggestions on how to prevent less after incubation may be of interest and benefit now, says the Philadelphia Rec-
